December 26, 2023

## F0166 - EMS Functions in ICS

### Course Description:

*This two-day course, students will practice use of the Incident Command System (ICS) in coordination with other public safety responders.*

*This course will present scenarios requiring responders to structure their EMS resources within the guidance of the National Incident Management System ICS, as appropriate to the needs of the different incident types. Through simulation and role-playing, students will demonstrate the implementation of EMS components in an ICS at medium- or large-sized incidents.*

### Course Syllabus:
